Vancouver, Canada and Paris, France - CTMI completes successful server capacity expansion.

CTMI is pleased to announce that the recent server transition to enhance capacity completed successfully and without major service disruptions, and would like to thank its clients for their suggestions and support.

CTMI's service families include business verification, Intellectual Property Protection, high-security corporate and public sector digital services, regional economic development support and more.

In addition, CTMI is working with its partners on expanding a new project examining the future of digital crypto currencies in the combined private and public sector space and as part of international supply chains, with a special focus on government-supported international trade settlement.
